

## Spectrum Pacific

### Dust suppression and/or odour control system

The Spectrum Pacific is a high-pressure system that pumps water or water and Spectrum Odour Neutraliser, through nozzles to create a fine atomised mist.

The system operates with either mains or generator supplied power (24V/415V) and mains supplied potable water.

The stainless steel construction of the cabinet means it is fully waterproof and can be located outside. The 7-day timer control allows the system to function without frequent operator attention this feature ensures reduced running costs and maintenance.

### Typical Applications:

- Waste transfer stations
- Landfill sites
- Composting sites
- Remediation sites
